Power Seat™

Keeps People Independent at Home

Uplift Power Seat™ is an electric-powered lifting seat that gently lifts and lowers users from an armchair or sofa.

TARGET CUSTOMER

- Customers who need help getting up due to arthritis, Parkinson's, MS, ALS or other joint and neuromuscular conditions.
- Customers who do not want to replace their favorite armchair or sofa.
- Customers who own a lift chair but need something to use in other rooms.
- People who are mostly confined indoors - whether at home, visiting, or in assisted living.

CUSTOMER BENEFITS

- Keeps people independent and at home longer.
- Can be stopped at any height needed.
- Conserves the users' energy for activities other than struggling to get up.

BEST SEATS TO USE

- A favorite armchair
- The sofa - beside the arm
- Dining room chair
- Kitchen chair

MEDICARE

- HCPCS Code: E0628, Medicare Part B
- Requires Certificate of Medical Necessity (CMN) from a physician.
- Conditions include arthritis, degenerative joint and neuromuscular disease.

Bringing quality to life.

Power Seat™

FEATURES

EASY TO USE

The power lever acts like a switch.
Simply click up to rise, push down to lower.
The middle position will stop the lift at any time.

PATENTED LeveLift™

The flexible seat curves to a flat surface that lifts users up on a level plane. This patented design provides for a safe lift up, with no forward dumping motion.

WATERPROOF

The breathable fabric cover is waterproof and machine washable in cold water.
Comes in black.

POWER LEVERS

Power Seat comes with two detachable power levers that can be used on either the left or right side of the cushion.

EASY CARE

The memory foam cushion has a water resistant coating that can be wiped down with mild soap and water.

BUILT-IN HANDLE NON-SKID BOTTOM

The base has a built-in handle and a non-slip material covering that prevents the cushion from shifting on fabric seating surfaces.

MEMORY FOAM CUSHION

Slow release memory foam provides additional comfort and prevention against pressure sores.

Model PS1000

Lifts users up to 300lb
