Bariatric

Products

Invacare's Bariatric Solutions logo

The logo represents Invacare's commitment to providing bariatric solutions to providers and clinicians, as well as to your patients. Invacare achieves this through offering a breadth of the highest quality bariatric products and provides solutions by educating providers and clinicians on these products and the bariatric market as a whole. Invacare's products and programs improve the quality of life for patients. An uplifting and active-presence logo is what Invacare wishes to convey to all of your bariatric clients through these products and services.

Invacare is committed to serving the unique needs of bariatric patients. At the same time, Invacare is committed to serving the needs of providers as you address the special requirements of this diverse segment of the population.

Invacare's research is aimed at discovering ways to make bariatric patients' lives better. These products and programs are based on these findings and designed with the utmost care. Invacare is also continually adding to and enhancing this product line, which is engineered to meet the needs of your bariatric clients.

From power chairs to beds, lifts and commodes, Invacare's Bariatric product line is so extensive you'll find everything your patients need, right here in these pages. Invacare has included educational information to help you further understand the bariatric market, a color-coded chart to assist you in locating products by their weight capacities and additional helpful product suggestions. Just place a single phone call and you can fill a complete prescription simply, efficiently and conveniently.

When your order is delivered, you can be sure you've received something more: the highest-quality engineering; outstanding durability; testing to demanding specifications such as ANSI/RESNA and Invacare's own rigorous standards; and the backing of Invacare's exceptional limited warranty.

Just call 800-333-6900 to receive a copy of the Bariatric products price list (Form No. 99-277). You may also visit www.invacare.com.

What is bariatrics?

Bariatrics is the study and treatment of obesity and those diseases associated with obesity. Diet, exercise, behavior modification, lifestyle changes, institutional and home medical equipment, medications and, in some cases, surgery are the tools used by bariatric physicians to help patients manage obesity.¹

What is obesity?

Obesity is defined as an excessively high amount of body fat or adipose tissue in relation to lean body mass. The amount of body fat (or adiposity) includes concern for both the distribution of fat throughout the body and the size of the adipose tissue deposits. Body fat distribution can be estimated by skinfold measures, waist-to-hip circumference ratios or techniques such as ultrasound, computed tomography or magnetic resonance imaging.²

What is BMI?

Body Mass Index or BMI is a tool for indicating weight status in adults, representing weight levels associated with the lowest overall risk to health. It is a measure of weight for height. For adults over 20 years old, BMI falls into one of these categories:³

BMI

Below 18.5 = Underweight
18.5 – 24.9 = Normal
25.0 – 29.9 = Overweight
30.0 and above = Obese

SEE CHART ON PAGE 3 TO DETERMINE BMI.

How does BMI relate to health?

The BMI ranges are based on the effect body weight has on disease and death. As BMI increases, the risk for some diseases also increases. Some common conditions related to overweight and obesity include:³

- Cardiovascular disease
- High blood pressure
- Osteoarthritis
- Premature death
- Some cancers
- Diabetes

BMI is not the only indicator of health risk.

BMI is just one of many factors related to developing a chronic disease (such as heart disease, cancer or diabetes). Other factors that may be important to look at when assessing your risk for chronic disease include:⁴

- Diet
- Physical activity
- Waist circumference
- Blood pressure
- Blood sugar level
- Cholesterol level
- Family history of disease

Some statistics....

Obesity and obesity-related diseases are some of the nation's leading causes of preventable death. Smoking is the number one cause of preventable death in America.¹

Currently, 64% of U.S. adults are either overweight (BMI of 25 or greater) or obese (BMI of 30 or greater). The increase in obesity over the past 30 years has been fueled by environmental, social, economic and behavioral factors, acting on a background of genetic susceptibility.⁵

Invacare® MVP® Wheelchair with HD Package

The Invacare® MVP® Wheelchair is the premium folding chair in the custom manual wheelchair line and has established a tremendous reputation for high performance. That performance is now available with a weight limit of 350 lb. The unique design of the MVP Wheelchair offers two rear frame options with the heavy-duty package, so it feels, fits and looks as great as it performs. For the best combination of folding-chair convenience and custom manual chair performance, the MVP Wheelchair is the only chair you'll need.

Features

- 350 lb. weight capacity (Heavy-Duty package)
- Lightweight folding chair
- Two rear frame options are designed to meet the consumer's needs – square rear frame for increased stability, and the curved rear frame for increased maneuverability
- A wide range of options ensure versatility and comfort
- Parts are interchangeable among MVP chairs
- Adjustable Tension Back upholstery is available
- Choice of fixed or swing away front end
- Camber choices from 0°-9°
- Tapered front riggings are available
- Crutch and Cane Carrier option
- Available non-adjustable or adjustable rigidizing handle bar

Standard Manual Wheelchairs
Up to 350 lb.

Invacare® Top End® Terminator® Everyday Wheelchair

The same craftsmanship that goes into the Invacare® Top End® award-winning sport chairs can be found in the Invacare® Top End® Terminator® Everyday Rigid Wheelchair. Custom built to your specifications, this model offers your choice of seat heights, wheels, arm styles and footrests. The chair comes standard with a 250 lb. weight capacity - a heavy-duty option will hold up to 350 or 450 lb. depending on the frame material. An ergonomic seat option builds a "sweet spot" that's especially effective for those who sit in a squeeze of 2" or more. Because it is tailored to your needs, the Terminator Everyday Wheelchair comes ready to roll, with no need for cumbersome adjustments. If you're looking for value and performance, the Terminator Everyday Wheelchair is your top choice.

Features

- 350 lb. weight capacity/450 lb. titanium chrome-moly steel
- Custom built rigid frame
- Adjustable center-of-gravity
- Camber: 0, 3, 6, or 9°
- Folding back
- Adjustable or fixed back height
- Adjustable tension upholstery w/straps and anchor loops
- 22", 24" or 25" high performance Sun® wheels
- Hard anodized handrims
- High pressure clincher tires
- Wheel locks: push or pull to lock
- 3" micro or 4" or 5" semi-pneumatic front casters
- Tubular or adjustable angle footrest: 4" adjustable height
- Powder coat paint

Invacare® Solace® Prevention Mattress

Cost effective, single and dual-layer design lowers interface pressure for the low-medium risk patient.

SPS0080

Invacare® Solace® Prevention SPS0080 Mattress

Model no.

SPS0080

The Invacare® Solace® SPS0080 mattress is an economical foam mattress which features a single layer of foam specially fabricated to provide three zones of pressure reduction. It is designed to reduce patient interface pressure across the surface.

SPS1080

Invacare® Solace® Prevention SPS1080 Mattress

Model no.

SPS1080

Zoned top layer relieves pressure in the important susceptible body zones. The convoluted "fortress" cut design offers more surface area for patient support and relief. Two layers of high quality foam include softer head and heel sections.

SPS2080

Invacare® Solace® Prevention SPS2080 Mattress

Model no.

SPS2080

Added to the design are built-in side supports. The head and heel-soft sections add comfort and protection, while the side supports provide stability and durability.

SPS3080

Invacare® Solace® Prevention SPS3080 Mattress

Model no.

SPS3080

The soft heel section is upgraded to visco-elastic foam to cradle the sensitive area. This product provides comfort and support with built-in side supports and dual layer "fortress" cut foam.

STS1080

STS2080

STS3080

SRS1080

Invacare® Solace® Therapy STS1080 Mattress

Model no.

STS1080

Precision three-layered mattress of die-cut foams provides pressure relief around bones, increases air flow to reduce surrounding temperature and provides uniform weight distribution for increased patient comfort. Included in the STS1080 mattress are side supports to provide stability and durability.

Invacare® Solace® Therapy STS2080 Mattress

Model no.

STS2080

Added to the design is a visco heel section to add comfort and protection.

Invacare® Solace® Therapy STS3080 Mattress

Model no.

STS3080

Building more into the therapy mattress is a specially designed visco-elastic foam top to cradle the entire body in foam. This series provides comfort and support and includes side supports and three layers of "fortress" cut style foam.

Invacare® Solace® Resolution SRS1080 Mattress

Model no.

SRS1080

Our most advanced foam mattress is designed for those patients who require the highest degree of pressure relief. The dual layer design incorporates two different types of foam to provide not only a therapeutic pressure-relieving surface but also one that is supportive and comfortable using high-density foam. In addition, the mattress has a heel slope to alleviate pressure along with built-in side supports. The convoluted fortress cut design offers more surface area for patient support and relief.

Invacare® microAIR® Alternating Pressure Therapeutic Support Mattress

Invacare® microAIR® MA50 Alternating Pressure Mattress Overlay

Model no. MA50

The Invacare® microAIR® MA50 overlay is a full-featured alternating pressure overlay powered by a 10 LPM compressor with four alternating pressure cycles of 5, 10, 15 and 20 minutes.

Invacare® microAIR® MA51 Alternating Pressure Therapeutic Support Mattress System and 10 LPM Compressor

Model no. MA51

The Invacare® microAIR® MA51 is an alternating pressure mattress replacement which reduces interface pressure to aid in the prevention and treatment of Stage I to IV pressure ulcers.

Invacare® microAIR® MA55 Alternating Pressure Mattress with On-Demand Low Air Loss and 10 LPM Compressor

Model no. MA55

In addition to all the features of the MA51 alternating pressure mattress, the MA55 model improves air circulation and cools the body temperature with a unique system of air released into the mattress.

Invacare® microAIR® MA65 Alternating Pressure Mattress with On-Demand Low Air Loss and 50 LPM Compressor

Model no. MA65

The MA65 model improves air circulation and cools the body temperature with a unique system of air released into the mattress. MA65RSR (Raised Side Rails available).

Invacare® microAIR® Alternating Pressure Therapeutic Support Mattress

Invacare® microAIR® MA80 True Low Air Loss Mattress Replacement System and 1275 LPM Blower

Model no. MA80

The Invacare® microAIR® MA80 mattress model is a true low air loss mattress that helps manage skin moisture to avoid maceration and maintain a dryer environment for pressure ulcer healing in the treatment of Stage I to Stage IV pressure ulcers. The mattress and blower system automatically maintains five different pressure zones for softer head and heel sections and firmer torso pressure interfaces. Pulse settings are available on the MA80 unit. MA85RSR (Raised Side Rails available).

Invacare® microAIR® MA85 True Low Air Loss Mattress with Alternating Pressure and 1275 LPM Blower

Model no. MA85

Building on the true low air loss model benefits of improved air circulation, body temperature cooling and skin moisture management, the Invacare® microAIR® MA85 model increases the therapy with the addition of alternating pressure to reduce surface interface and offer pressure relief. Alternating pressure settings of 5, 10, 15, and 20 minutes are available on the MA85 unit. MA85RSR (Raised Side Rails available).

Invacare® microAIR® MA90Z Lateral Rotation Mattress with Alternating Pressure and On-Demand Low Air Loss with 50 LPM Compressor

Model no. MA90Z

The turn is offered to angles up to 30° for pulmonary therapy requirements with options for ¼, ½ and ¾ turns. Turn times available are 10, 20, 30 and 60 minutes with options to turn right or left only as well as both sides.

Invacare® microAIR® MA95Z Lateral Rotation Mattress with Alternating Pressure and True Low Air Loss with 1275 LPM

Model no. MA95Z

This model allows for customization of patient therapy settings including up to 45° of turn, time and pressure. Alternating, static and pulse therapies are available in addition to the lateral rotation and continuous true low air loss relief.

Power Wheelchairs
Up to 400 lb.

Invacare® 3G Storm Series® Arrow® Power Wheelchair

The Invacare® 3G Storm Series® Arrow® Rear-Wheel Drive Power Wheelchair offers the benefits of Invacare® Gearless Brushless GB™ TrueTrack motors. TrueTrack allows the chair to maintain it's true forward path keeping the chair tracking straight. TrueTrack motors ultimately result in less fatigue for drivers of alternative controls.

Features

- 400 lb. weight capacity
- Independent spring-and-shock rear-wheel suspension reduces jolts and vibrations for clinical and functional comfort
- Upgraded Invacare® Gearless Brushless GB™ motors deliver approximately 15% more power and increases speed by 60% to 7 mph from previous heavy-duty motors
- Full electronic communication and switch option capability with Invacare® MK6i™ electronics
- Four independent drives
- Useful arm pockets to store personal items
- Adjustable rehab seat efficiency accommodates changing consumers' needs

Invacare® Solara® 3G Tilt-In-Space Wheelchair

The Invacare® Solara® Wheelchair is known for its durability of frame construction and gear tilt mechanism design. The new generation Invacare® Solara® 3G Wheelchair retains this durability, and once again revolutionizes tilt-in-space wheelchair design with incredible simplicity, portability and ease of use and adjustment.

Features

- 400 lb. weight capacity (heavy-duty package)
- Center-of-gravity remains constant throughout tilt range
- Positive lock mechanism eliminates “sponginess” common to locking hydraulic cylinders
- Tilt angle indicator
- Standard flared front provides more space for user’s feet and reduces interference when tilting in the anterior direction
- One axle plate accommodates all wheel sizes
- -5° to 50° of total tilt available
- Adjustable-depth, adjustable-angle back canes

Specifications

Model No:	SOLARA 3G
Frame style	Tilt
Seat width	12" - 24"
Seat depth	12" - 22"

Invacare® Matrx® Flovair™ Cushion

The Invacare® Matrx® Flovair™ Cushion is designed to provide pelvic stability, leg positioning and pressure management for individuals with postural asymmetry and skin integrity concerns. The Invacare Matrx Flovair Cushion begins with the base for comfort, stability and function. This hybrid cushion captures the stability of foam, the pressure redistribution of air and the shear management of fluid.

Features

- Inner cover is vapor permeable to allow air circulation while preventing fluid penetration
- Works in tandem with the Invacare® ThinAir™ bladder to maximize surface area for optimal pressure redistribution
- Comfort layer assists in redistributing peak pressures away from bony prominences
- Soft foam base allows immersion of pelvis for comfort and stability
- Gentle or Max Contour choices based on need for gentle or high level of posture control

Invacare® BAR750 Bariatric Bed

The Invacare® BAR750 Bariatric Bed is a heavy-duty full-electric bed frame capable of supporting up to 750 lb. (650 lb. patient weight capacity). With the consumer in mind, this bed expands from 39" wide to a full 48" and from 80" in length to 88". Four ultra-quiet DC actuators easily reposition the head and foot sections, as well as the bed height. And, for the ultimate in safety, the bed comes standard with a battery backup.

Features

- 750 lb. total weight capacity
- Heavy-duty frame design ensures added strength for client support
- Split-spring design eases delivery and setup
- Two locking casters on head section and two steering lock casters on foot section
- Two high-low motors, one on head section and one on foot section
- Pendant allows for dynamic client positioning
- Quiet, smooth operation
- Integrated battery backup, bed ends and half rails standard
- Choose from three mattress width options
- BARMATT Mattress options meet fire safety regulations 16CFR1633 and 16CFR1632

Invacare® 9000 Topaz™ Wheelchair with HD Package

The Invacare® 9000 Topaz™ Wheelchair is designed specifically to suit the unique needs of the bariatric population. The Topaz Wheelchair combines the strength and durability of a carbon steel frame with the comfort of heavy-duty front riggings and arms for proper positioning. With a variety of seat widths and depths, frame reinforcements that include gusseted sides, caster journals and dual heavy-duty crossbraces, this chair provides not only ease in maneuverability, but stability that will be trusted for years to come.

Features

- 700 lb. weight capacity. HD package option for 1,000 lb. weight capacity upgrade available
- Available in vinyl or nylon upholstery
- Reinforced frame includes gusseted sides, caster journals and dual heavy-duty crossbraces
- Heavy-duty front riggings provide proper positioning for feet with footrest and elevating legrest
- Heavy-duty arms designed to accommodate weight capacity and provide proper positioning
- Dual axle positions allow for quick and simple seat-to-floor height variations (17.5" and 19.5")
- Low-maintenance, dual-sealed precision bearings
- Heavy-duty triple inner liners help seat and back resist stretching
- Flame-retardant upholstery resists mildew and bacteria, as well as cold-crack and UV damage
- Available in black or silver vein frame finish

Invacare® microAIR® Alternating Pressure Therapeutic Support Mattress

Invacare® microAIR® MA65B Alternating Pressure Mattress with On-Demand Low Air Loss and 50 LPM Compressor

Model no. MA65B48

In addition to all the features of the MA60 alternating pressure mattress, the Bariatric MA65B42 model and MA65B48 model improve air circulation and cool the body temperature with a unique system of air released into the mattress.

Invacare® microAIR® MA80B True Low Air Loss Mattress Replacement System and 1275 LPM Blower

Model no. MA80B48

The Invacare® Bariatric MA80B42 and MA80B48 mattress models are true low air loss mattresses that help manage skin moisture to avoid maceration and maintain a dryer environment for pressure ulcer healing in the treatment of Stage I to Stage IV pressure ulcers. The mattress and blower system automatically maintain five different pressure zones for softer head and heel sections and firmer torso pressure interfaces. Pulse settings are available on the MA80 unit.

Invacare® microAIR® MA85B True Low Air Loss Mattress with Alternating Pressure and 1275 LPM Blower

Model no. MA85B48

Building on the true low air loss model benefits of improved air circulation, body temperature cooling and skin moisture management, the Invacare® microAIR® MA85B model increases the therapy with the addition of alternating pressure to reduce surface interface and offer pressure relief. Alternating pressure settings of 5, 10, 15, and 20 minutes are available on the MA85B unit.

Invacare® microAIR® MA90ZB Lateral Rotation with Alternating Pressure Mattress and On-Demand Low Air Loss with 50 LPM Compressor

Model no. MA90ZB48

The turn is offered to angles up to 30° for pulmonary therapy requirements with options for ¼, ½ and ¾ turns. Turn times available are 10, 20, 30 and 60 minutes with options to turn right or left only as well as both sides.
