Malleo Sensa

for active stabilization

The 50S5 Malleo Sensa is a form-knitted active bandage for the upper ankle joint. It supports sensorimotor functions and thus activates muscle stabilization. The integrated anatomic silicone pads in the medial and lateral areas stabilize the ankle joint. By means of targeted compression, they also promote the resorption of edema, hematoma and effusions. The three-dimensional, flat-knitted fabric with compression-reduced rims provides comfortable compression and a fit without creases.

Malleo Senso

Indication

- Post-operative and post-traumatic irritations
- Effusions and swellings
(e.g. in case of arthrosis or arthritis)
- Tendomyopathies
- Ligament laxity
- Feeling of instability

Effect

- Support of sensorimotor functions and thus activation of muscle stabilization
- Intermittent compression for resorption of edema, hematoma and effusions
- Pain relief
- Functional improvement of the ankle joint

Features

- Three-dimensional, flat-knitted fabric
- Integrated anatomic silicone pads
- Compression-reduced rims
