

EMINEO

– when activity and rest are equally important

New leg supports

New head and neck support system

New side supports

The Emineo gives you options you won't find with other wheelchairs. Active driving position, stable sitting position for activity, or resting position when you want a break. The unique tilt function can be used by either the user or the caregiver.

- Comfort and sitting stability
- User-operated tilt function
- Very good rolling characteristics
- Simple and quick to adjust
- Attractive and modern design

handicare

- Crutch holder
- Seat cushion
- New special leg support for foot/leg in plaster

Head and neck supports

New head and neck support system with much greater functionality from fewer variants.

Two standard models.

Two advanced models.

Fixed leg support

New and smart leg support which can quickly and easily be adjusted to 70°, 80° or 90°. Very stable and lightweight. Leg support is approved for lifting with user in chair (140 kg).

Angle adjustable legrest

New angle adjustable and length-compensating legrest which locks securely in one single action. The leg support follows the knee's natural point of rotation, and does not stick up above seat height. This makes sideways transfer easier.

Side supports

New functional side supports which can be swung out for easy transfer. Height- and depth-adjustable, with stable and comfortable padding.

COLLISION TESTED
