Magic Black

The Invacare® Pronto® M94™ with SureStep® combines innovative features and exceptional quality to provide a power wheelchair that meets the mobility needs of bariatric consumers. The M94 features the patent-pending SureStep technology that makes negotiating thresholds and transitions of up to three inches high effortless. Also featured is the patent-pending Stability Lock technology that helps ensure that the chair will remain stable with the consumer in control. These two innovative features paired with its sleek styling make the Pronto M94 a truly exceptional power chair for consumers weighing up to 500 pounds.

Center-Wheel Drive

Center-wheel drive offers the tightest turning radius, as well as improved tracking and ease of driving, compared to our other configurations.

SureStep®

This patented automatic system ensures that everyday obstacles and thresholds are handled elegantly for a smooth ride.

Stability Lock

An important issue with more maneuverable chairs is stability, but this patented technology helps ensure that the chair remains stable, with the consumer in control.

TCD™ Traction Control Design

TCD improves traction in forward and reverse - especially important for transitioning onto ramps and backing up in grass.

4-Pole Motors

Proven Invacare® 4-pole motors provide high torque and true gear reduction for many rehab needs.
