Chill-Out Rock'er Roll'er

Build the Chill-Out Chair that's
right for YOU in 5 Easy Steps!

- ➊ Style Choice
- ➋ Size & Fit Guide
- ➌ Chair Options (Foam Quality/Pricing/Warranty)
- ➍ Tactile Fabric Covers
- ➎ Accessories

Where will the Chill-Out Chair be used?
Choose Rock'er or Roll'er Base.

Relax at Home or Reward at Therapy

Both the Rock'er or Roll'er can be used for single or multi-user environments and is a great addition to your Home or Therapy Center.

While at home, your child no longer needs to remain confined to their wheelchair, laid on the floor or propped up with pillows on the sofa. Give them the dignity they deserve with their very own cool piece of furniture that allows them to sit safely and comfortably without restraint with the rest of the family.

At Schools, Therapy Centers and Hospitals, do your students or clients need a place to relax during therapy? They can hang out in a cool chair while being fed or communicated with. Both the foams and fabrics meet with some of the highest standards of flame resistance.

Rock'er and Roll'er base styles are available from Extra Small to Large sizes with two different foam options to choose from. Based on Focus Groups, fabric colors and textures for the covers have been carefully chosen for their desired occupant response, from smooth and soothing to highly textured for increased stimulation.

➊ Select Style Choice

☐ *Rock'er*

The built-in Rock'er Base provides a soothing back and forth motion. Within moments, the occupant can be calmed and ready to focus on specific activities such as therapy, communication or feeding. Alternatively attach it to the Ottoman (included) for stability. (Handles sewn into ottoman and back of chair for easy transporting)

NEW *Tilt*

☐ *Roll'er*

The Roll'er Base provides safe and supportive alternative seating. Great for spinning!

Constructed with a wood base and four 3" caster (2 locking), wheel the occupant from room to room with ease! Push Bar, Feeding/Communication Tray or Positioning Blocks are other options sold separately.

Ottoman

All Chill-Out Chairs include a multi-positional Ottoman that: supports and elevates the legs; assists circulation; and helps reduce edema of the lower extremities. The Ottoman can also function as a side table for the occupant and/or caregiver. When set on its end, it provides an ideal position for the caregiver to assist the occupant with activities such as feeding, communication, therapy or to provide physical or emotional comfort.

Give your loved one or client the oasis they deserve with their very own Chill-Out Chair! No more constant sitting in wheelchairs or scooters. This great alternative seating solution allows occupants to sit safely without restraint in the most dignified and supportive position possible. Occupants can benefit from tactile and sensory stimulation as well as calming cocooning, deep pressure and squeeze effects.

Creating a CYCLE of mobility

<input type="checkbox"/> 1" Memory Foam Liner
<input type="checkbox"/> Medbloc Liner

FOAM QUALITY

Foam is all about Density and Firmness. Simply put, Density is the weight of a cubic foot of foam. The higher the density, the longer the product will last. And Firmness, expressed as ILD (Indentation Load Deflector), is the pressure it takes to push down on the foam. The higher the number, the firmer the foam.

The different Chill-Out Chair foam grades, densities and firmness configurations have been purposefully chosen with pressure relief and support in mind. All foam meets all UFAC and CALIF. Tb117 requirements and is flame resistant.

NEW Tb133 - The California Technical Bulletin 133 Flammability test is intended for seating furniture for use in occupancies that are considered to be public occupancies (i.e. health care facilities, public auditoriums, hotels, etc.) This test procedure is not intended to be used for the evaluation of residential furniture. Furniture complying with Tb133 is safer when subjected to ignition sources.

MEMORY FOAM

An added 1" layer of heavy weight, quick cooling, breathable foam provides pressure reduction and comfort without heat build-up.

MEDBLOC LINER

A very durable, lightweight and washable moisture prevention barrier. The smooth knit backing is soft and flexible with heat-sealed seams to prevent moisture seepage protecting the hygienic integrity of the foam.

MEDBLOC LINING
RESISTANT TO MOISTURE
