

016-640 Instant-read Ear Thermometer

The Insta-Therm's™ compact design and speed makes taking a temperature easier and more comfortable for infants and young children.

What's more it's water-proof lens cleans up easily and is calibrated to give you a consistent and accurate reading without the use of a probe cover.

And, this is what makes the Insta-Therm™ so revolutionary.

Because, other ear thermometers are calibrated for use with a probe cover and, as you know, most people don't use the probe covers, this greatly compromises the accuracy of their readings.

To Learn more about what Accuflex™ and Insta-Therm™ Thermometers can do for you, contact your AMG Sales Representative or, call: (toll free) 1-800-363-2381 (Montreal) 514-737-5251
