

## LONG-TERM CARE **BEDS**

Improve Safety for Residents and Staff

# long-term care beds

## Why replace existing beds?

### Improve safety for fall-risk residents

#### 👉 Medline Solution

- Low height on Alterra 1232 bed is 7.25"
- Optional staff control to lockout one or more functions of the remote control

### Reduce the risk of caregiver back injury

#### 👉 Medline Solution

- Maximum height on Alterra 1232 bed is 26"
- Alterra 1232 bed can be moved at any height

### Comply with FDA entrapment guidelines

#### 👉 Medline Solution

- All Medline long term care beds meet FDA entrapment guidelines when used with Medline recommended mattresses

### Be better prepared for power failures and emergency situations

#### 👉 Medline Solution

- Battery back-up is a standard feature on the Alterra 1232 bed

### Excellent after-sales service

#### 👉 Medline Solution

- Your dedicated Medline sales representative can help with staff in-service and also address any after sales issues

### Improve quality and appearance

#### 👉 Medline Solution

- Eliminate wall damage - Wall guard is a standard feature on Alterra 1232 bed
- Medline offers longest warranty in the market – 4 years on electronics, 15 years on frame and LIFETIME on welds
- Modular design makes it easy for bed maintenance/repair
- Custom head and footboards available to enhance coordinated appearance

*Medline offers a comprehensive line of beds with optional accessories, including soft-touch rails and staff controls.*

## A Wide Selection of Choices

Medline offers a comprehensive line of full-electric and manual beds that meets the needs of long-term care facilities, even for ones with capital budget constraints. Medline beds are built to last, as evidenced by our generous warranty. In addition, Medline can help you consolidate purchases and take advantage of our flexible payment plans.

***Medline offers individually tailored payment plans based on your credit.  
Contact your Medline sales representative for specific details.***

## Alterra 1232

### **Minimize the risk of caregiver injury**

The Alterra 1232's maximum height of 26" makes it easy to care for residents without straining, helping to reduce the risk of back injuries.

### **Minimize caregiver injury while moving the bed**

The Alterra 1232 bed can be moved at any height. All eight casters rotate a full 360 degrees, increasing maneuverability even in tight spaces. For extra safety, four of the eight casters lock into place.

### **Eliminate wall damage**

The bed moves from its lowest (7.25") to highest (26") height without any horizontal movement, eliminating wall damage.

### **Be better prepared for power failures**

**Battery backup** keeps bed functioning during power outages or emergency situations.

### **Improve Safety for fall-risk residents**

**Ideal for fall-risk or Alzheimer's patients** with a low height of 7.25".

*The Alterra 1232 eliminates potential wall damage by moving straight up and down.*

*The Alterra 1232's battery back-up is mounted on the bed frame and keeps bed functional during a power outage or emergency situations.*

*The Alterra 1232's wall guard is placed near the head section to prevent wall damage.*

*Stability knobs ensure that the head and footboards are properly secured.*

*Mattress retainers keep the mattress in place for safer transfer in and out of bed.*

*Shown with optional Soft-Touch Rails and Staff Control Custom Head and Footboard.*

### Safety and comfort for the resident

The Alterra 1232 is built with the resident in mind, with the following features designed for safety and comfort:

- A **smooth, quiet performance** is delivered by four ultra-quiet, dependable DC motors.
- **Multiple positioning options** are made possible by the bed's motors, which control the bed's height, knee hinge and reclining head deck. Residents are able to choose the perfect position for watching TV, reading, socializing or just resting.
- **Repositioning and rolling over are made easier** by the bed's soft-touch rails. When lowered, the rails are lower than the height of a standard mattress, making transfer on and off a stretcher hassle-free.
- **Strength and comfort** are afforded by the bed's unique grid/rib deck that prevents the structure from sagging.
- The **easy-to-operate** hand pendant makes experiencing all of the Alterra 1232's features quick and hassle-free.
- **Convenient** T-cable allows the hand pendant to be operated from either side of the bed.
- **Head and footboards are secured** by stability knobs.

## Alterra 1100

### Full electric bed

Medline's Alterra 1100 full-electric bed provides maximum positioning comfort through independent and simultaneous operation of the head, knee and hi-low functions. The DC motors provide smooth, whisper-quiet operation. The Alterra 1100 is a strong, well-built, low-maintenance electric bed suitable for the majority of residents in a long-term care facility.

### Benefits and Features

- **Ideal positioning and comfort** are offered by separate head deck, foot deck and bed height functions.
- **Ease of movement and secure locking** with three-inch braking casters.
- **Easy central locking system** enables bed to rest on secure legs in all elevated positions.
- **Smooth, quiet** DC electric motors control the head deck, foot deck and height.
- **Head and footboards are secured** with stability knobs.

### PRODUCT SPECIFICATIONS

ASSISTED LIVING FACILITIES

## Medline Manual 1000

### Manual bed

Medline's Manual 1000 manual bed offers an appealing alternative with its durability, strength and low maintenance. This bed is well-built and economical enough to be used throughout your facility.

### Benefits and Features

- **"Shin-friendly" cranks** drop out of the way under the footboard when not in use.
- **Ease of movement and secure locking** with three-inch braking casters.
- **Easy central locking system** enables bed to rest on secure legs in all elevated positions.
- **Floor scratches are prevented** by specially designed cranks.

## Medline Bariatric

### Bariatric bed

Our Bariatric bed is a great alternative to renting bariatric beds for your facilities. With a 600 lb. weight capacity and 42" extra-wide sleeping surface, this bed is designed to comfortably accommodate larger patients.

### Benefits and Features

- **Patient safety** is ensured by a heavy-duty all-steel frame
- **Ideal positioning and comfort** are offered by a hand control that can maneuver the bed into multiple positions
- **Easy assembly** with minimal tools required for set-up

### PRODUCT SPECIFICATIONS

**Height range:** 18" to 26.5" (46-67 cm)

**Bed deck dimensions:** 80" (203 cm) long, 42" (107 cm) wide

**Overall length:** 88" (224 cm) long

**Weight capacity:** 600 lb. (272 kg)

**Deck style:** Pan deck

**Casters:** 2 locking, 2 non-locking

### Warranty information:

**Electrical/mechanical:** 2 years

**Bed frame/welds:** Lifetime warranty

Item number	Description
MDR107004	<b>Medline Bariatric Bed</b>
MDS89697BAR	Head/foot section rails
MDR211892	Foam mattress, 600 lb. capacity

*The heavy-duty pan deck supports up to 600 lbs.*

### MDS1000TPZ

*The stand-alone bariatric trapeze bar's frame is constructed of heavy-gauge, steel tubing for maximum strength.*

## Bed Accessories

Our extensive range of bed accessories complement our long-term care beds. Your Medline representative can help you determine the best options to meet your specific needs. *These accessories are compatible with all beds except the Medline Bariatric bed.*

### Soft-touch assist rails (FCE1232RSRN)

These steel rails have a coating that is soft to the touch and offer a less institutional look. They are comfortable to grip when rolling over or getting in and out of bed.

### Extra-tall rails (FCE1232RSRXT)

Low air loss mattresses are generally between 10" and 12" (25-30 cm) thick, about the same height as standard bed rails. Our extra-tall rails are the perfect complement for low air loss mattresses.

### Standard assist rails (FCE1232RSR)

These 29" (74 cm) assist rails are long enough to cover the entire head section of the bed and offer additional protection for patients at a high risk for falls.

### Staff control

This convenient control is mounted into the footboard of any bed and allows staff members to lock any or all bed functions to make the bed safer for select residents.

*Please refer to page 11 for the appropriate item number.*

### Bed extender (FCE1232EXT)

These extenders lengthen the bed from 80" to 84" (203-213 cm) to accommodate taller residents.

*Note: Available for FCE1232B, FCE1100B, FCE1000B*

### Assist bar (FCE1232ABN)

This positioning aid has a cane shape that is easy to grip for elderly patients, when rolling over or getting in and out of bed. Also, swings away for easier patient transfer.

### Trapeze mounting kit (FCE1232TPZ)

Our trapeze adapter kit is mounted on the bed's frame so that it can move up and down with the bed, allowing the trapeze to be used at any height.

*Note: Trapeze (MDS80615T) not included*

# ORDERING INSTRUCTIONS

Item number	Description
-------------	-------------

## 1 Pick the Right Bed

FCE1232B	<b>Alterra 1232</b> hi-low bed only (Refer to page 4)

FCE1232RHFQOS **Head/footboards in quartered oak finish with staff control mounted on the footboard**, staff control connecting cables, mounting hardware and mattress retainers for FCE1232B bed.

**Custom Head/Footboards** Please see "Custom Head/Footboards Options" (to the right) to order custom head and footboards with or without a staff control.

**Examples of How to Build Your Custom-Finish Head/Footboard Item Numbers:**

ITEM NUMBER	STAFF CONTROL	ITEM NUMBER	EXTRA-WIDE BED	ITEM NUMBER	EXTRA-WIDE BED	STAFF CONTROL
FCE01RHF	S	FCE01RHF	W	FCE01RHF	WS	

Add suffix "S" to the item numbers to order the **staff control** (example: FCE01RHFS).  
 Add suffix "W" to the item numbers to order the **extra-wide bed** panels (example: FCE01RHFWS).  
 Add suffix "WS" to the item numbers to order the **extra-wide bed with staff control** (example: FCE01RHFSWS).

FCE1232HDW **Mounting hardware for head/footboards** for FCE1232B, FCE1233B, FCE1100B and FCE1000B beds.

## 3 Select Assist Rails & Accessories

FCE1232RSRN **Soft-touch assist rails** for FCE1232B, FCE1233B, FCE1100B and FCE1000B beds. These assist rails can be mounted either on the head section or on the foot section of the bed deck. **HCPSC Code: E0305**

FCE1232RSR **Head section assist rails** for FCE1232B, FCE1233B, FCE1100B and FCE1000B beds. **HCPSC Code: E0305**

FCE1232RSRXT **Extra-tall rails** for FCE1232B, FCE1233B, FCE1100B and FCE1000B beds. These assist rails can be mounted either on the head section or on the foot section of the bed deck.

FCE1232ABN **Assist bar** for FCE1232B, FCE1233B, FCE1100B and FCE1000B beds.

FCE1232TPZ **Trapeze adapter kit** for FCE1232B, FCE1233B, FCE1100B and FCE1000B beds. *Note: Trapeze (MDS80615T) not included*

FCE1232EXT **Bed extenders to make bed 84" long** for FCE1232B, FCE1100B and FCE1000B

FCE123276FS **Foot section to make bed deck 76" long** for FCE1232B, FCE1100B and FCE1000B

Items listed above are compatible with all beds except for the Medline Bariatric bed.

## Custom Head/Footboards OPTIONS

## Custom Head/Footboards FINISH OPTIONS

Natural Maple

Quartered Oak

Wild Cherry

Provincial Cherry

Gunstock Walnut

\*Custom finish head/footboards for: FCE1232B, FCE1233B, FCE1100B and FCE1000B beds. FCE1232HDW must be ordered with this item.

### Low-Profile Overbed Table

Our low-profile overbed table is specially designed to have an exceptionally low profile base and fit under hi-low beds without damaging the table or the underside of the bed. The base of the table is only ½" (1 cm) thick, which easily fits under hi-low beds even when they are in their lowest position.

These tables are ideal for residents who are at a high risk of falling and for whom hi-low beds are typically kept at a low height.

Attached floor glides help prevent the table from scratching the floors.

## PRODUCT SPECIFICATIONS

<b>Height range:</b>	Adjustable from 24.5" to 39" (62-99 cm)
<b>Top:</b>	15" (38 cm) W x 30" (76 cm) L, 0.75" (2 cm) thick
<b>Base:</b>	Low-profile
<b>Weight capacity:</b>	50 lbs. (23 kg)
<b>Frame:</b>	Chrome-plated column & base
<b>Casters:</b>	1.5" (4 cm) twin wheel casters

\*\*\* Refer to Hospital Bed System Dimensional and Assessment Guidance to Reduce Entrapment. (Document issued on: March 19, 2006)

# Which bed fits your needs?

Use this list of questions to help you determine which Medline long-term care beds best fit your needs.

## **1. Do you need an adjustable-height bed?**

Our Alterra 1232 and 1233 hi-low bed has a low height of 7.25" (18 cm) and a maximum height of 26" (66 cm) for resident and caregiver safety and ease of use. Our Alterra 1100 and Medline Manual 1000 beds have a height range of 12" (30 cm) to 23.5" (60 cm).

## **2. What style of bed is best for your residents?**

Medline offers beds with the following features:

- Hi-low full-electric (Alterra 1232)
- Extra-wide hi-low full-electric (Alterra 1233)
- Great value full-electric (Alterra 1100)
- Manual style (Medline Manual 1000)
- Bariatric full-electric (Medline Bariatric)

**3. Are you looking for an extra-long bed to accommodate taller residents?** The standard Medline bed is 80" (203 cm) long. If you desire extra length on a standard bed, our bed extenders can increase the length of the bed to 84" (213 cm).

**4. Are you preparing for more bariatric residents at your facility?** The Medline Bariatric bed is a great, cost-effective alternative to renting a bariatric bed.

**5. Are you on a tight budget but still want to offer full-electric beds?** Medline offers a range of full-electric beds to fit every budget. Our most economical choice is the Alterra 1100 bed.

**6. Are you replacing beds to make the environment safer for residents?** The Alterra 1232's low height of 7.25" (18 cm) makes it a great choice for residents at risk of falling. Its top height of 26" (66 cm) also reduces the chance of caregivers experiencing back injuries while caring for residents.

**7. Are you looking to attract private-pay customers by offering an extra-wide bed?** Our Alterra 1233 bed has an extra wide sleeping surface, making its dimensions 39" (99 cm) wide by 80" (203 cm) long. This roomy, comfortable bed offers a feeling closer to that of the beds your residents enjoyed in their own homes.

## **8. Would you like to be able to selectively lock out functions on the hand pendant for patient safety?**

Alterra 1232 and 1233 full-electric beds can be equipped with an optional staff control. This control is mounted on the footboard of the bed and allows staff to lock down any or all of the functions on the hand pendant. An LED light indicates to caregivers when functions have been locked down.
