

# Starla

**For Stairs That Turn**

# Stannah

**The Stairlift People**

**The Starla 260 is custom-made for stairs that turn.**

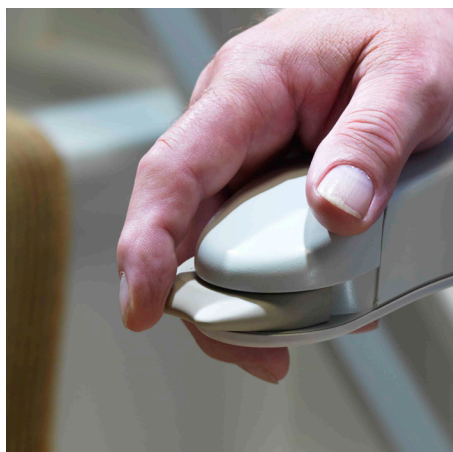

**The slimline rail and fold-away chair make the best use of available space, and leave enough room for others to use the staircase.**

**Installed in just a few hours, the Starla 260 makes it easier and safer to get up and down stairs, saving you the trouble and expense of moving to a new home.**

**It's just the lift you need!**

Call or send the stairlift using the remote on either landing, then sit down with the footrest folded up out of the way. A sensor in the cushion prevents the stairlift from moving until safely seated. Press a button on the chair to lower the footrest into place. The retractable seat belt is mounted on the armrest within easy reach, for added security.

A gentle touch on the armrest control causes the Starla to move smoothly up or down the stairs. At the top landing the chair swivels so that the back of the chair blocks the stairs as you stand up.

The versatile Starla 260 is attached to the stair treads, not the wall, so it can be placed on whichever side of the stairs is most convenient. If space allows, the stairlift can be designed to park the chair away from the stairs. For added safety, the Starla can remain in the swiveled position to form a barrier at the top of the stairs.

## Upholstery Colors

### Fully Upholstered

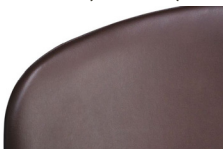

Green (woven)

Red (woven)

Stone (woven)

Brown (vinyl)

Beige (vinyl)

### With Dark Wood Trim

### With Light Wood Trim

## Starla 260 Key Features
