

Lightweight Rollators

For who you are & what you need.

Feeling good, staying active and enjoying your life is important at any age. Because knowing that you can get up and go, anywhere, anytime is vital to your independence, active lifestyle, and enjoyment of life, we developed **Airgo®** rollators.

While other rollators only offer basic support, a seat and a basket, the new **Airgo®** Rollators offer you the ultimate in comfort, convenience, stability and security.

Walking is a safe, easy and effective form of exercise; your rollator can actually help to improve your health and may even increase your energy level over time, as you walk.

Try one today and feel the difference with every step!

Real Life Engineering

At AMG, we do our best to produce the most reliable rollators possible. Your **Airgo®** Rollator is guaranteed to be free from defects in materials and workmanship. This commitment demands that our products are engineered to last, but more importantly, it allows you the freedom and confidence to get up and go, anywhere, anytime!

As well, we encourage and solicit user and retailer feedback in order to see and learn how to continuously improve and refine our rollators. We call this "Real Life Engineering" and it means that **Airgo®** Rollators get better every day.

Exclusive features that make a difference!

Only Airgo® features Ergo-form handgrips that fit much more comfortably and place your hand at a natural angle for better brake access. They allow you to reach and grip the brakes without shifting, allowing for better control and added safety.

Feather-touch brakes for easy manoeuvrability.

✓ All models

The Ergo-Back is simply the most comfortable rollator backrest available today. It features an ergonomically shaped soft padded cushion made from high density foam. The Ergo-Seat's ergonomic shape and high density foam cushion with laminated memory foam on top provides unrivalled seating comfort. Its unique design distributes weight effectively across the entire surface, reducing average pressure

measurements by as much as 70% over most rollator seats (see pressure maps).
